All pedestals and chassis are constructed with 3/4” thick balanced 3-ply panels. Panels are securely fastened together using rails that are bored and doweled, glued, metal reinforcement brackets and wood cleat construction. Thick end panels are pre-bored to accept a tee nut for the adjustable glide and are reinforced with pvc banding to prevent glide tear out. Glue blocks are used where 3/4” thick panels are joined, bored for tee nut to accept adjustable glide.

Veneer
Boss is standard with Quartered Walnut veneer that is slip-matched. They are cut perpendicular to a log's growth rings with quartered veneers and generally produce a very straight grain. Veneer leaves are cut consecutively and are easy to match. In many species, this method will reveal a decorative element in the wood. Quarter slicing produces smaller veneer leaves and has a higher-end veneer appearance. Boss veneers are slipmatched, meaning adjoining veneer leaves are fed out in sequence without being turned so that the same side of the veneer leaves is exposed. This allows the leaves' grain pattern to repeat across the face of the panel, improving color uniformity.

Veneer tops
Veneer table desk and Veneer conferencing tops are 1-1/8" thick on 45lb density MDF core comprised of 100% recycled and recovered wood fibers with a balanced 3-ply construction. All veneer tops are Quartered Walnut that is slipmatched and features a 3mm external solid hardwood band with profile edge. Tops are finished in a 5-sheen matte finish.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Veneer

DARRAN only uses HPVA AA Grade Flat Cut Cherry, Maple, and Walnut Veneers and AA Grade Quartered Oak. EdgeWorksis also available in double cut reconstituted walnut and oak patterns made from rapidly renewable wood veneer providing a repeatable consistent straight grain pattern. All veneers are selected and matched for balance and consistency.

Veneer Tops

EdgeWorks veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminate Tops

EdgeWorks high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge, laminate self-edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

TFL top

Thermally Fused Laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1” thick on MDF core that is comprised of 100% recycled and recovered wood fibers. All Thermally Fused Laminate tops are available with a 2mm flat PVC band. Laminates in wood grain patterns feature Timberline Texture providing the grain pattern of wood.

Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Adjustable glides

Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Power

A large selection of power pods are available and handle power, data, docking stations and communication. See options section for selection.

Wire management

Wire management capabilities include standard and optional worksurface grommets. Specify W21 under surface wire channels for organization and management of all communication wires and cords. Sold separately to conceal wire under worksurfaces.

Conference wire management

Power and data cables can be discretely housed and managed with the W21 Grey Wire Manager. This can be mounted in any location to metal frame or underside of conference tables and runs cables through a 1" channel from power module to hollow steel legs. This keeps cables organized under the table top. Release clips make it simple to snap on and off the Wire Manager for easy organization and access after attached to the table

W21: Grey Wire Manager (10.5") - $35

Grove Live Edge Warranty & Care

The DARRAN Grove Collection features natural live edge solid wood slab tables. The Grove slabs are all individually unique with different grain variations, knots, variations in color, splits, and holes that all add to the natural beauty of each table. The natural characteristics are further enhanced by a protective varnish top coat that provides superior resistance to water marks, heat damage, chemical contact, and scratch resistance.

Warranty

All tables and bases have a one-year warranty. We will repair or replace (at our option) any faulty product deemed to have been caused by manufacturing defects. Live edge materials have inherent inconsistencies, natural defects and irregularities that are part of their unique nature. These are considered to be desired effects. Solid wood adjusts different times of the year to the moisture content of the air. In a sense the wood breathes. Wood will also adjust to the moisture content of your office and its surroundings. You may notice your slab furniture piece move and develop small cracks or dips. This is normal. Slab furniture cannot be compared to other solid wood furniture pieces. This product will have movement during its life and this is just the nature of natural wood slab furniture.

Care

In order to maintain the natural beauty of your Grove table, DARRAN recommends the following:

- Clean your Grove Table using a soft, damp cloth with a mild soap and wipe dry.
- DARRAN's protective varnish top coat uses the latest advanced finishing technology to preserve the beauty of each Grove Table. Even with this protection, DARRAN recommends the use of coasters with drinks and to clean up any spilled liquids immediately. Avoid direct contact with hot items, harsh chemicals, and some plastic feet on desk accessories as they could damage the finish.
- Take into account the humidity levels. This natural solid wood will continually contract and expand throughout its life and it will remain very sensitive to abrupt environment change, such as humidity, long after it has been harvested. Humidity levels should always remain between 30-50% to preserve your Grove table. Exposure to extreme fluxuations can cause additional cracking in the slab and would not be considered a manufacturer defect. A furniture repair expert can secure a new crack with a wood butterfly and then recoat the top.
- Avoid placing your table in direct sunlight to prevent wood bleaching and color changes associated with UV exposure.

Cleaing wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Powerports

A large selection of power pods are available and handle power, data, docking stations and communication. See options section for selection.
