Diva features & advantages

Veneer and HPL tops

Veneer tops and high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1" thick. DARRAN only uses HPVA A Grade Flat Cut Cherry, Maple, and Walnut Veneers and A Grade Quartered Oak and Ash Veneers. Cherry and Walnut veneers are book-matched. Oak, Maple, and Ash Veneers are slip-matched. Veneer tops feature a 3mm external solid hardwood band, HPL tops features a 2mm flat PVC band or a 1mm laminate self-edge. Some collections feature double cut reconstituted walnut and oak veneers.

TFL tops

Thermally Fused Laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1" thick. Laminate tops feature a 2mm flat PVC band.

Wire management

Power and data are concealed without notice under the beautiful quartered Ash surface of the table. A system of W21 cable clips and connectors run cords safely and cleanly around corners. Cable management is accessed by integrated undercarriage panels that easily slide from open to close. Solid wood legs feature a cavity that runs power to the floor. Specify W21 under surface wire channels for organization and management of all communication wires and cords. Sold separately to conceal wire under worksurfaces.

Seamless grommets

The Seamless Grommet includes 8 power and 2 data plate.

PSG82: Power Seamless Grommet - \$1,875

The Seamless Grommet is configured to include Seclusion Power Pods mounted under the hinged Seamless Grommet. Each Seclusion has 4-power and one customizable data plate.

Diva specifications

Undercarriage: Ash veneer ply, formed and finished in Lofty Ash

Leg Connectors: Die cast aluminium (Standard Color White)

Aluminium extrusion Rails

European Ash legs finished in Lofty Ash

Die cast aluminium feet (Standard Color White)

Table top size to 144" are achieved with 4 legs

2" adjustable glides

Diva is available in seated height and standing height (for certain size tables).

Power/data in hollow legs

Diva offers hollow solid Ash wood legs for clean wire management. Power & data wires gain access to the table through the die-cast feet on Diva's legs.

Diva specifications

Diva undercarriage is always finished in WLA Lofty Ash finish

Undercarriage

Undercarriage conceals wires and powerpods. W21 wire management clips can be specified to assist in managing cables under the table. The undercarriage consists of a sliding panel system to conceal wires below the table and provide a "complete finish" to the table.

Diva has an undercarriage which is designed to provide a "complete finish" to the table. The undercarriage conceals all wiring to the powerbox and can be removed by an un-trained worker to gain access to under-table wiring.

Rails

The rails were designed using Finite Element Analysis, assessing minimal material input for greater strength and durability. Diva can comfortably be produced as a 144" table with only 4 legs.

Leg to rail connectors

The die cast Leg and Rail connectors feature a patented design for joining rails together. The patented clamping system eliminates exposed screws and enhances the level of finish on the Diva table system.

Grove live edge warranty & care

The DARRAN Grove Collection features natural live edge solid wood slab tables. The Grove slabs are all individually unique with different grain variations, knots, variations in color, splits, and holes that all add to the natural beauty of each table. The natural characteristics are further enhanced by a protective varnish top coat that provides superior resistance to water marks, heat damage, chemical contact, and scratch resistance.

Warranty

All tables and bases have a one-year warranty. We will repair or replace (at our option) any faulty product deemed to have been caused by manufacturing defects. Live edge materials have inherent inconsistencies, natural defects and irregularities that are part of their unique nature. These are considered to be desired effects. Solid wood adjusts different times of the year to the moisture content of the air. In a sense the wood breathes. Wood will also adjust to the moisture content of your office and its surroundings. You may notice your slab furniture piece move and develop small cracks or dips. This is normal. Slab furniture cannot be compared to other solid wood furniture pieces. This product will have movement during its life and this is just the nature of natural wood slab furniture.

Care

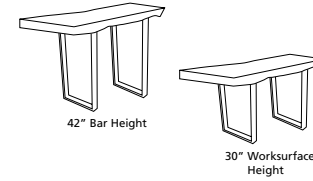

In order to maintain the natural beauty of your Grove table, DARRAN recommends the following:

- › Clean your Grove Table using a soft, damp cloth with a mild soap and wipe dry.
- › DARRAN's protective varnish top coat uses the latest advanced finishing technology to preserve the beauty of each Grove Table. Even with this protection, DARRAN recommends the use of coasters with drinks and to clean up any spilled liquids immediately. Avoid direct contact with hot items, harsh chemicals, and some plastic feet on desk accessories as they could damage the finish.
- › Take into account the humidity levels. This natural solid wood will continually contract and expand throughout its life and it will remain very sensitive to abrupt environment change, such as humidity, long after it has been harvested. Humidity levels should always remain between 30-50% to preserve your Grove table. Exposure to extreme fluxuations can cause additional cracking in the slab and would not be considered a manufacturer defect. A furniture repair expert can secure a new crack with a wood butterfly and then recoat the top.
- › Avoid placing your table in direct sunlight to prevent wood bleaching and color changes associated with UV exposure.

COM/COL ordering instructions

Please complete the COM Submission Form prior to ordering the fabric from the supplier. All COM fabrics must be approved prior to order submission. Please refer to our website or contact DARRAN Seating Customer Service for an updated list of preapproved COM fabrics. Application instructions must be specified on the purchase order or COM/COL submission form. Thinking quietly design

Designed by Thinking Works Design Studio

In a lively setting, Thinking quietly's range of acoustic furniture turns the volume down on peripheral sound. Acoustic engineers assisted in the design process of this collection that focuses on reducing external noise. Sound comfort with a 21st Century design fits perfectly in the modern office!

Acoustic Engineers used acoustic modeling software to determine that a Thinking quietly 4-Pack with the acoustic umbrella, screens, and desk pads has up to a 44% improvement over a standard open plan station with screens.

Scope

2, 4, and 6 pack workstations with 54", 60", 66", and 72" tops. Conference room settings offering 29" heights with wood or laminate. Available in round, square, and rectangle shapes. Thinking quietly workstations are available with or without the umbrella. Optional front screens are available with or without umbrella. Deletion of the signature acoustic panels will reduce the effectiveness of the noise reduction.
