PERFORMANCE TESTED
All products are tested to ensure performance exceeds BIFMA / ANSI standards.

FINISH TECHNOLOGY
DARRAN has continued its partnership with AkzoNobel Chemicals (www.akzonobel.com) to develop a new finish technology further improving indoor air quality with a coating that meets today’s environmental standards and supports LEED buildings.

ENVI-CT (Environmental Coatings Technology) utilizes advanced European finish technology to deliver a high-end furniture coating with superior performance in appearance and durability, allowing DARRAN to deliver more sustainable products to our customers.

ENVI-CT Advantages:
› ENVI-CT is a re-engineered high performance Coatings Top Coat
› Exceptional hardness and clarity
› Highly resistant to solvents and chemicals
› Plasticizer Migration resistant
› Excellent UV inhibitors for maximum color resistance
› Exceeds current and proposed future Federal and State air quality requirements
› Field Repairable
› Dynamic chamber emissions tested and certified compliant to ANSI/BIFMA X 7.1 Standard / LEED 4.5 Standard for low – VOC emitting furniture.

ADVANTAGES
DARRAN collaborated with the world’s leader in finishing materials, to formulate an additive that will inhibit the growth of mold, mildew, fungus and bacteria on wood surfaces. This additive infuses Silver Ions into DARRAN’s ENVI-CT (Environmental Coatings Finish Technology), creating a protective surface for the life of the furniture. The best part - is standard on all DARRAN Casegoods for no additional fee.
LIMITED LIFETIME WARRANTY
DARRAN Furniture Industries, Inc. ("DARRAN") warrants that each piece of furniture manufactured in its North Carolina Facilities will be free from defects in material and workmanship for as long as the original purchaser owns and uses the product. Subject to the limitations and exclusions herein, DARRAN, at its discretion and as the sole remedy under the DARRAN Limited Lifetime Warranty, will replace or repair a defective product or components with comparable product or components free of charge. This warranty is made only to the original purchaser from an authorized DARRAN dealer, for as long as that original purchaser owns and uses the product.

LIMITATIONS: USE / CARE
› Warranty is limited to normal single shift use.
› Warranty is limited to generally accepted care and maintenance of natural wood products and environments.
› Natural wood surfaces are subject to denting, scratching, and gauging if not properly used and cared for. Warranty is subject to use and care in accordance with the use and care instructions provided in the Product Care section of this site (including, but not limited to, the care and maintenance guide downloads linked theron), available at www.darran.com/product care, which are incorporated herein by reference.

LIMITATIONS: MATERIALS / COMPONENTS
› Laminates, Veneers / Finishes - 10 Years
› Electrical lamps, Ballasts, Transformers - 3 Years
› Fabrics, Pneumatic lifts, Foam - 5 Years
› Custom products built to customers specifications - 3 Years
› Solid wood tables - 1 year

WARRANTY EXCLUSIONS
Damage identified as carrier or installer related.
› Normal wear and tear of wood products during course of ownership.
› Color, grain, or texture of natural wood materials, laminates, and other covering materials.
› Damages or failures resulting from misuse, abuse, negligence, improper care, modifications, or relocation.
› Non Commercial use or locations.
› So-called “ghost” indentions and similar damage caused by the failure to use appropriate desk or writing pads.

All Warranty Claims are subject to DARRAN-approved inspections. Disputes may involve independent third-party evaluation

QUALITY ASSURANCE
DARRAN manufactures in accordance with the standards set by Architectural Woodwork Institute (AWI) for Quality Standards.

Every unit produced at DARRAN is completely inspected by an independent quality control team located within each plant whose emphasis is on assembly, finish, and final inspections with empowerment to stop any unit not meeting DARRAN’s high quality standards.

LIGHT AND NATURAL FINISHES
The beauty of veneer and all wood products comes from the variations created by nature including color, grain, and texture. These variations are not considered defects and DARRAN's Limited Lifetime Warranty does not cover color, grain and texture variations associated with natural wood and grain seen in any finish color. DARRAN sets standards for veneer selections; however, variations, especially apparent in light/natural finishes, will occur from one piece to another even if they are finished at the same time.

Finishes such as Clear Maple, Light/Gunstock Walnut, and Clear/Caramel Cherry will display more natural characteristics due to their light stain. Grain, pattern and color from unit to unit are not guaranteed or warranted and products will not be replaced due to these variations. Exposure to light and age will cause darkening of natural wood products; therefore DARRAN cannot guarantee or warrant finish match of new products being placed with existing products in the field.

GLASS
Use of glass overlays on surfaces will void DARRAN's Limited Lifetime Warranty, unless the overlay is installed and maintained in strict accordance with DARRAN’s instructions. If an overlay is to be used, please contact DARRAN for installation and maintenance instructions.

GENERAL
Performance questions will be tested to generally accepted practices and AWI guidelines and standards for wood veneer furniture. To obtain performance of the Limited Lifetime Warranty, the purchaser should contact in writing the authorized DARRAN representatives or current dealer who sold the product to the purchaser or mail the warranty claim to:

Factory authorization must be secured from DARRAN’s warranty department prior to incurring repair charges. Warranty will utilize DARRAN’s National Repair Service through the Furniture Medic Franchise (www.furnituremedic.com).

Repair charge authorizations are based on:
› Set travel rate
› Average regional job rate
› Factory set maximum repair time
› Falsely reported defect claims are subject to local service charges being charged to dealer/distributor.

FINISH MAINTENANCE
Wood office furniture and wood finishes can retain their natural beauty for life if proper care is taken and a stable environment is provided. Fluctuations in humidity and temperature cause panels and solid wood components to expand and contract and may lead to panel warpage and finish “checking” or cracking. Prolonged exposure of furniture to dry heat during winter months should be avoided. Careful examination of interior wood trim may indicate a damaging dry environment. If open joints, splits and cracks are appearing in trimwork consult with a HVAC professional for appropriate remedy.

DARRAN finishes are field repairable should damage occur. Professional furniture repair services are recommended. Regular cleaning with a non-silicone polish is recommended.

POWERPORTS
Choose Byrne’s Salt power port. Salt includes two powered USB ports. Salt power ports can be added to square stools only.
The DARRAN Grove Collection features natural live edge solid wood slab tables. The Grove slabs are all individually unique with different grain variations, knots, variations in color, splits, and holes that all add to the natural beauty of each table. The natural characteristics are further enhanced by a protective varnish top coat that provides superior resistance to water marks, heat damage, chemical contact, and scratch resistance.

CARE
In order to maintain the natural beauty of your Grove table, DARRAN recommends the following:

› Clean your Grove Table using a soft, damp cloth with a mild soap and wipe dry.
› DARRAN’s protective varnish top coat uses the latest advanced finishing technology to preserve the beauty of each Grove Table. Even with this protection, DARRAN recommends the use of coasters with drinks and to clean up any spilled liquids immediately. Avoid direct contact with hot items, harsh chemicals, and some plastic feet on desk accessories as they could damage the finish.
› Take into account the humidity levels. This natural solid wood will continually contract and expand throughout its life and it will remain very sensitive to abrupt environment change, such as humidity, long after it has been harvested. Humidity levels should always remain between 30-50% to preserve your Grove table. Exposure to extreme fluctuations can cause additional cracking in the slab and would not be considered a manufacturer defect. A furniture repair expert can secure a new crack with a wood butterfly and then recoat the top.
› Avoid placing your table in direct sunlight to prevent wood bleaching and color changes associated with UV exposure.

WARRANTY
All tables and bases have a one-year warranty. We will repair or replace (at our option) any faulty product deemed to have been caused by manufacturing defects. Live edge materials have inherent inconsistencies, natural defects and irregularities that are part of their unique nature. These are considered to be desired effects. Solid wood adjusts different times of the year to the moisture content of the air. In a sense the wood breathes. Wood will also adjust to the moisture content of your office and its surroundings. You may notice your slab furniture piece move and develop small cracks or dips. This is normal. Slab furniture cannot be compared to other solid wood furniture pieces. This product will have movement during its life and this is just the nature of natural wood slab furniture.
