DARRAN®

Grove Features & Advantages

From Table edge to the leg:
120" = 17" Inset
96" = 12" Inset
76" = 10" Inset

Butterflies are hand placed based on the tables natural cracks. Natural cracks in the wood are considered normal and enhance the beauty of the tables.

Every table is unique with live edge detailing

Metal legs standard in black. Optional in matte black and silver.

The Acacia tree is fast growing and known for its beautifully figured grain and distinct sap lines.

Solid slabs can vary from 2" - 3" thick.

Finish

Each Grove slab features a protective clear coat to enhance the natural cracks of the solid wood.

Welltech Finish delivers a superior furniture coating with exceptional performance that can withstand stringent cleaning agents and possesses unparalleled durability, allowing DARRAN to provide lasting, sustainable products to our customers.

Every stool or table is unique with live edge detailing

Butterflies are hand placed based on the stools natural cracks. Natural cracks in the wood are considered normal and enhance the beauty of the stools.

Stool depth varies

Powerports

Choose Byrne's Salt power port. Salt includes two powered USB ports. Salt power ports can be added to square stools only.

DARRAN®

The DARRAN Grove Collection features natural live edge solid wood slab tables. The Grove slabs are all individually unique with different grain variations, knots, variations in color, splits, and holes that all add to the natural beauty of each table. The natural characteristics are further enhanced by a protective varnish top coat that provides superior resistance to water marks, heat damage, chemical contact, and scratch resistance.

Warranty

All tables and bases have a one-year warranty. We will repair or replace (at our option) any faulty product deemed to have been caused by manufacturing defects. Live edge materials have inherent inconsistencies, natural defects and irregularities that are part of their unique nature. These are considered to be desired effects. Solid wood adjusts different times of the year to the moisture content of the air. In a sense the wood breathes. Wood will also adjust to the moisture content of your office and its surroundings. You may notice your slab furniture piece move and develop small cracks or dips. This is normal. Slab furniture cannot be compared to other solid wood furniture pieces. This product will have movement during its life and this is just the nature of natural wood slab furniture.

Care

In order to maintain the natural beauty of your Grove table, DARRAN recommends the following:

- › Clean your Grove Table using a soft, damp cloth with a mild soap and wipe dry.
- › DARRAN's protective varnish top coat uses the latest advanced finishing technology to preserve the beauty of each Grove Table. Even with this protection, DARRAN recommends the use of coasters with drinks and to clean up any spilled liquids immediately. Avoid direct contact with hot items, harsh chemicals, and some plastic feet on desk accessories as they could damage the finish.
- › Take into account the humidity levels. This natural solid wood will continually contract and expand throughout its life and it will remain very sensitive to abrupt environment change, such as humidity, long after it has been harvested. Humidity levels should always remain between 30-50% to preserve your Grove table. Exposure to extreme fluxuations can cause additional cracking in the slab and would not be considered a manufacturer defect. A furniture repair expert can secure a new crack with a wood butterfly and then recoat the top.
- › Avoid placing your table in direct sunlight to prevent wood bleaching and color changes associated with UV exposure.
