## Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

## Veneer tops
Capitol Park veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

## Laminate tops
Capitol Park high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

## Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tearout.

## Overhead cabinet construction Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Bookcase Construction
All chassis (sides, back, top, and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

## Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

## Drawers
All drawers are constructed with mitre joint/dowel construction in a natural maple finish with four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of 1/2” thick wood grained wrapped 5 sided miter-folded construction with 1/4” thick hardboard bottoms reinforced for heavy weight capacity. Drawers have been tested and pass BIFMA 50,000 cycle test. All drawers are guaranteed lifetime with free replacement warranty.

## Drawer fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2, 4, and 6 doors. All tower fronts matched in vertical sets.

## Optional wood drawers
Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.
Optional Wood Drawer (Any Size) – Option Code P33...$40 List Price Per Drawer

## Suspensions
All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother, quieter range of motion with soft close operation and are rated at 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and are rated at 150lbs. Lateral files include anti-tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

## Hinges
Units with doors include 95 degree swing hinges.

## Filing
Capitol Park features a highly durable black plastic extrusion that is securely fastened into a route on top of the drawer to support hanging files. An adjustable crossbar is provided for all file drawers that enables legal/letter filing front to back or side-to-side based on the drawer size.

## Locks
Locks are Standard on all drawers below the worksurface. Random lock cores are installed at the factory. Some units may be shipped with the same key number. Locks are Silver, Black or Bronze and match pull finish unless otherwise specified.

Jamestown high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

## Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tear out.

## Overhead cabinet construction
## Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Bookcase construction
All chassis (sides, back, top, and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

## Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

## Drawers
All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2” thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16” thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

## Standard Wood Drawers
Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

## Drawer Fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2, 4, and 6 doors. All drawers and doors have traditional scallop profile edge shape. All tower fronts matched in vertical sets.

## Suspensions
All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion with soft close operation and are rated at 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and are rated at 150lbs. Lateral files include anti-tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

## Hinges
Units with doors include 95 degree swing hinges.

## Filing
Jamestown features metal file frames around the perimeter of the drawers with cross bars secured to the drawer sides to support hanging files. A metal adjustable cross bar is standard with all file drawers to support letter/legal filing front to back or side to side. File drawers have one adjustable cross bar and lateral files have two adjustable cross bars. See filing reference for details.

## Cleaning wood & laminate

DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal

Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

## Veneer Tops
Prado veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8" thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

## Laminate Tops
Prado high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

## Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws, and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tear out.

## Overhead cabinet construction Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Bookcase construction
All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

## Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

## Drawers
All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2” thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16” thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

## Drawer Fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2, 4, and 6 doors. All tower fronts matched in vertical sets.

## Standard Wood Drawers
Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

## Suspensions
All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion

with soft close operation and are rated at 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and are rated at 150lbs. Lateral files include anti-tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

## Hinges

Units with doors include 95 degree swing hinges.

## Veneer

## Veneer tops
Richmond Park veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

## Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Bookcase Construction

Optional heavy-duty shelves are 1” thick lumber core balanced 5 ply construction.

## Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

## Drawers
All drawers are constructed with mitre joint/dowel construction in a natural maple finish with four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of 1/2” thick wood grained wrapped 5 sided miter-folded construction with 1/4” thick hardboard bottoms reinforced for heavy weight capacity. Drawers have been tested and pass BIFMA 50,000 cycle test. All drawers are guaranteed lifetime with free replacement warranty.

## Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

## Chassis & pedestal

All pedestals and chassis are constructed with 3/4” thick balanced 3-ply panels. Panels are securely fastened together using rails that are bored and doweled, glued, metal reinforcement brackets and wood cleat construction. Thick end panels are pre-bored to accept a tee nut for the adjustable glide and are reinforced with pvc banding to prevent glide tear out. Glue blocks are used where 3/4” thick panels are joined, bored for tee nut to accept adjustable glide.

## Overhead cabinet construction Freestanding & wall mount

Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Bookcase Construction

All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

## Tackboards

Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

## Adjustable glides

Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

## Drawers

All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2” thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16” thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

## Drawer fronts

Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2, 4, and 6 doors. All drawers and doors have traditional scallop profile edge shape. All tower fronts matched in vertical sets.

## Standard wood drawers

Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

## Suspensions

All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother, quieter range of motion with soft close operation and are rated at 100 lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and are rated at 150 lbs. Lateral files include anti-tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

## Hinges

Units with doors include 95 degree swing hinges.

## Filing
Rift features metal file frames around the perimeter of the drawers with cross bars secured to the drawer sides to support hanging files. A metal adjustable cross bar is standard with all file drawers to support letter/legal filing front to back or side to side. File drawers have one adjustable cross bar and lateral files have two adjustable cross bars. See filing reference for details.

## Locks
Locks are standard on all drawers below the worksurface. Random lock cores are installed at the factory. Some units may be shipped with the same key number. Locks are Silver, Black or Bronze and match pull finish unless otherwise specified.
