FENIX LAMINATES

The benefits of FENIX® surface material:

- Soft to the touch
- Extremely matte
- Resists fingerprints
- Highly resistant to scratches, abrasion, acid-based solvents and household cleaners

PAINT COLORS

SO, WHAT IS FENIX® SURFACE MATERIAL?

FENIX® materials are made of paper (over 60%) and thermosetting resins (30 - 40%). The FENIX® products are created by a pressing process in which heat and pressure are applied simultaneously in order to obtain a homogeneous non-porous product. First introduced in 2013, FENIX® was developed after years of research and development by an international team of scientists and engineers. Thanks to proprietary technology, FENIX® is able to achieve its incredible surface properties by undergoing a series of processes, including a multilayer coating and use of next-gen acrylic resins, which are then hardened and fixed through an Electron Beam Curing process.

Table bases are constructed of precision molded bent plywood base with oak veneer faces.

Tops available in veneer, high pressure laminate, or Fenix soft touch laminate color with an infinity edge to give a soft and slim appearance.

Bases available in any contrasting or coordinating finish or paint.

Subtle metal bracket enables color accent.
